

3-3751-RM RECHARGEABLE MAGNETIC BEACON

- Built in Rechargeable Lithium battery
- Up to 6.5 hours battery operation with full power flash / quad flash pattern
- Up to 12 hours battery operation in extended battery mode.
- Magnetic mount
- Full 360° light coverage
- Wind Speed tested.

The Impact 3-3751-x-RM rechargeable beacon has a built in rechargeable battery providing a up to 12 hours battery operation time. It is available with Amber, Blue, Green or Red light output.

To recharge the beacon simply plug into a 12V outlet using the supplied cigar lead. The lead can be detached from the beacon when not in use.

8 powerful 3W Generation 3 LEDs provide a full 360° coverage, the beacon includes an EC65 approved rotating pattern. Multiple other flash patterns are included, these can be selected via the pattern change button which is located on the charging lead.

A button on the charging lead also allows the user to select either full output mode or extended battery mode. In extended battery mode the LED flash power is reduced giving up to 12 hours operating time.

Recharge time from discharged is approx 4 hours. The beacon can be powered from the charging lead allowing the unit to still be operated with a discharged battery if required. The beacon has a built in intelligent charger with an LED indicator to indicate charge status.

The 3-3751-R-M has been independently Wind speed certified to 180km/h.

Dimensions (mm): Height 85 base diameter 130mm , Lens diameter 106mm.		Weight
