

IMPACT SR/DR Beacon

compact single or dual layer beacon

- single or dual colour
- Built in flash controller with multiple patterns
- ec65 approved

The new Impact DR and Impact SR beacon ranges provide a solution for a wide variety of applications. Both ranges use the same housing, the design includes a raised mount to maximise visibility especially when mounted on high vehicles. Impact DR incorporates double layers of LED warning lights. These can either be a common colour or can be different colours with independent switching. Impact DR is available with any colour combinations of blue, red, white, amber or green LEDs.

Impact SR uses the same housing but with a single row of LEDs. The beacons are extremely visible despite their compact dimensions. An integral flash controller allows operation from 12 or 24V and provides a user selectable choice from 25 different flash patterns. Standard functions also include day / night brightness setting and cruise mode.

Dimensions (mm): Height 130 base diameter 160mm , Lens diameter 115mm.

12LED Single row

3-3651-EA	Permanent mount EC65 amber Class 1
3-3651-EB	Permanent mount EC65 blue Class 2
3-3651-R	Permanent mount red
3-3651-2	Permanent mount green or white

24LED Double row

3-3651-EAA	Permanent mount EC65 amber Class 1
3-3651-EBB	Permanent mount EC65 blue Class 2
3-3651-EAEB	Permanent mount amber / blue - EC65 amber Class 1 blue Class 2
3-3651-RR	Permanent mount red (or red/amber Combinations)
3-3651-22	Permanent mount green or white Combinations
3-3651-12	Permanent mount Non-EC65 amber or red + blue or green or white Combinations
-D	DIN mount for 3-3651 Range
